Some items shown may be optional equipment.

## **Micro-processor Controlled Control/Protection System #1556**

Provides engine protection & LED fault indicators for: Low oil pressure, High engine temperature, Overcrank & Overspeed. Also LED indicators for engine starting, engine running & engine preheating (some models). Optionally available with flat panel face configuration.

System features an engine controller w/autocrank that automatically preheats and cranks engine for a preset period of time. Control system allows for multiple remote stations for convenient in-cab or pump panel starting when generator is inaccessible. Includes: toggle power switch, toggle start switch, service hourmeter, 12VDC circuit breaker, 12VDC alternator light & 12 ft. control cord with weatherproof connectors. Factory wired & tested. Optional AC voltmeter and Engine temperature gauge available.
