

Stadco Control System

Micro-Processor Controlled

Control System Features:

- ◆ Micro-processor controller w/ autocrank starting & automatic preheat.
- ◆ Convenient error-free operation.
- ◆ 4-point safety shutdown system w/ LED fault indicators for:
 - Low Oil Pressure
 - High Engine Temperature
 - Overcrank
 - Overspeed
- ◆ Starter lockout.
- ◆ Toggle switch start/stop operation.
- ◆ Multiple remote station capable.
- ◆ NEMA3R Wall mount enclosure w/ hinged cover.

Some items shown may be optional equipment.

Micro-processor Controlled Control/Protection System #1556

Provides engine protection & LED fault indicators for: Low oil pressure, High engine temperature, Overcrank & Overspeed. Also LED indicators for engine starting, engine running & engine preheating (some models).

System features an engine controller w/autocrank that automatically preheats and cranks engine for a preset period of time. Control system allows for multiple remote stations for convenient in-cab or pump panel starting when generator is inaccessible. Includes: toggle power switch, toggle start switch, service hourmeter, 12VDC circuit breaker, 12VDC alternator light & 12 ft. control cord with weatherproof connectors. Factory wired & tested. Optional AC voltmeter and Engine temperature gauge available.
